Description

European Launch at the Dusseldorf Boat Show January 21 - 29 2023

The Aquador 250 HT is one of three new models.

The year 2023 is a landmark year for Aquador, beginning with the European launch of the 250 HT at Boot Dusseldorf in January.

Protection from the elements like a cabin, but with an open rear area out onto the cockpit – for complete protection, the rear of the cockpit can be fully enclosed using the canopy.

The roomy social area in the cockpit is a mark of design and practicality. All on one level, there is no need to navigate steps and ledges anywhere in the pantry, dining, and rear swim platform area.

Stepping down below into the forward cabin and once again the feeling of space and comfort is the first thing that you sense. Featuring a wide main sleeping berth, mid-berth divided by a privacy curtain, spacious head, and plenty of storage options, you have to remind yourself that you are on an 8-meter boat!

Length	7.83m		
Width	2.64m	Weight	2800Kg
Height, from water line	2.3m	Fresh water capacity	72L
Width, Hull	3.22m	Number of beds	4 persons
